Abstract (Basic): JP 4182601 A

Hardened films are formed on sides of transparent synthetic resin plate, surface of hardened surface film is plasma-, corona discharge- or alkali treated and metal deposited layer is formed on plasma, corona-discharge, or alkali treated surface. Pref. the plate is methacryl or polycarbonate resin, vinyl chloride, styrene, or cellulosic resin, and metal deposited film is Al or Au 100-1500 Angstrom thick.
